**GETTING STARTED**

**Ensure your Device is Unlocked**

For this service to function your device must be unlocked. It's possible that your operator “locked” your device to prevent its use with other operators' SIM cards. If this is the case, please call your network operator and request an “unlock code”. They should unlock the device but there may be conditions or a cost associated with this.

**Insert the SIM card chip**

1. Remove your existing SIM card chip and store it in a safe place.
2. Detach the International SIM card chip from its plastic holder. Keep the plastic holder in your purse or wallet because it has your phone number and PIN on it.
3. Carefully insert the SIM card chip into the metal bracket inside your device where your old SIM card was previously located.

**QUICK START**

Your service is ready to use.

Your Global phone number starts with +44. This number is printed on the SIM card holder.

When turning your phone on:
- Enter your PIN number.
- In the USA, Canada and Mexico enter 2 followed by your PIN number.

Your PIN number is 4 digits long and is printed on the SIM card holder.

Important: Please remember your PIN. Whenever you switch your device on, you will be asked to enter it. If you enter your PIN incorrectly 3 times your device will be blocked. You must then enter the PUK to unblock it. The PUK is a number printed on the SIM card, next to the PIN number.

**RECHARGE ANYWHERE, ANYTIME!**

Please note your device will be unable to access data if your credit falls below $5.

1. **Online**: To add credit to your service visit www.rechargeminutes.com sign in to your account using your phone number and PIN. A minimum recharge value of $10 is required.
2. **Call 24/7 customer service**: Call customer service using a toll free number from a landline or payphone. Please refer to the Customer Service section in this sheet. A minimum recharge value of $20 is required.

**AUTO RECHARGE**

Auto-Recharge automatically recharges your account with a minimum of $20 when your balance falls below $5. The automatic recharge is instantaneous and you receive a text message or an email when it occurs.

You will also receive a text message or email saying Auto-Recharge is either enabled or disabled. You can use your online account at anytime to enable or disable Auto-recharge, change your minimum balance or recharge amounts.

**BILLING RECORDS**

Records of your data usage and credit card charges are updated in real time in your online account. To access your call records, visit www.rechargeminutes.com and sign in with your phone number and PIN. From the top menu, select “My account” and then “Calling history” or “Billing history”.

**COVERAGE, RATES AND FEATURES**

To find out information on coverage, rates and features applicable to your service visit www.rechargeminutes.com and sign in with your phone number and PIN. From the top menu, select “My account” and then “My service”.

**TROUBLE SHOOTING**

Your device doesn’t display a network:

1. If this is the first time you have used the service, check that your device is unlocked.
2. If you incorrectly enter your PIN, you will not pick up a network. Please turn your device off, then on again and re-enter your 4 digit PIN printed on the SIM card. In the USA, Canada and Mexico enter 2 followed by the PIN.
3. Check that you are in a location that has coverage. If you are in remote countryside or are underground, you may not have coverage.
4. If you think you should have coverage, you may need to change the network. Use your device’s menu to view a list of networks, and change to a different network if one is available. You may need to refer to your device’s manual for instructions.
5. For further assistance, please contact our Customer Service using the details listed below.

**CONFIGURING YOUR DEVICE FOR PREPAID DATA**

Prepaid Data is available in over 145 countries (see www.rechargeminutes.com for details) and allows you to access the internet, Instant Messaging and email.

For this service to function your device must be unlocked. To unlock the device there may be conditions or a cost associated with it. Check your device’s user manual for more information.

Our prepaid data will not work in conjunction with a BlackBerry service.

Your device must be configured to work with our Prepaid Data service. Visit www.rechargeminutes.com, click on "Configure Data & MMS" and follow the prompts. If the automatic phone configuration process does not show your device, you will need to configure your device for data manually. This involves setting the Access Point Name (APN) to 'mobiledata'.

Please follow the instructions below to setup data for most Android devices:

**Android** – Select ‘Settings’, then ‘Wireless and network’, then select ‘Mobile networks’, then ‘Access Point Names’, then press or tap on the ‘Menu’ button and select ‘New APN’. Enter the ‘Name’ as ‘ekit’ and ‘APN’ as ‘mobiledata’. Press or tap the ‘Menu’ button and select ‘Save’. Ensure ‘ekit’ is selected as the preferred APN.

If you have an iPad, please see the reverse of this sheet for detailed instructions.
